

**We claim:**

1. A system for allowing a user to access content from a provider, the system comprising:  
  
a server for establishing a first connection to the user and a second connection to the  
provider to access the content; and  
  
5 a database for maintaining accounting information for the user and for the provider;  
  
wherein the server communicates with the provider over the second connection to  
retrieve the content to be accessed by the user without disclosing identifying information about  
the user to the provider.
2. A system of claim 1, wherein the server retrieves the content from the provider and stores  
10 the content in a cache for delivery to the user.
3. A system of claim 1, wherein when the content comprises a link to further content, the  
server delivers the content to the user while reformatting the link to prevent the user from  
following the link to the further content.
4. A system of claim 3, wherein the server reformats the link to the further content by  
15 replacing the link to the further content with a modified link for accessing the further  
content through the server.
5. A system of claim 1, wherein the server measures an amount of time the user spends  
viewing the content and enters the amount of time into the database.
6. A system of claim 1, wherein the server debits a fulfilled request from the user for the  
20 content from an account maintained for the user in the database without association to the  
provider or content requested.
